
SUMMER FUN

What is a frog's favorite summertime treat?

A hopsicle!

I can't wait to have delicious and flavory popsicles under the warm, July sun outside Zora Dora's! Is there really anything better than a summer breeze running through your hair while hiking up Mount Beacon? There are so many things to do in summer from licking that "hopsicle," to relaxing in a pool with flamingo pool things around you! What will you do this summer for fun?

One thing most of us will do is take a vacation. Paris, Florida, Mexico, or Montreal, you'll have a fantastic time! You can go anywhere you want. Perhaps not anywhere cold (for obvious reasons.) If you go to Paris, you'll probably go fashion shopping, check out the Louvre, and eat croissants everyday. California, on the other hand, you would probably explore the tidepools and discover sea anemones, crabs, snails, and more marine life. Occasional swims on hot, summer days.

If you do stay in Beacon, try exploring a new site everyday. Dia, Zakka Joy, and coffee shops you haven't been to yet. In the Dia, there's a room with optical illusions. Be sure to check that out. The Beacon pool is a fun, close, and open space to swim, splash, and sunbathe. Invite your friends to play with you at the pool and hours will seem like seconds!

For part of the summer, it's fun to go to a summer camp. There are lots of summer camps around here like Camp @ the Camp, farm camps, and theater camps like BPAC (Beacon performing arts center.) At Camp @ the Camp, you make art projects, go on hikes, and tie dye Camp @ the Camp shirts. Wherever you go, you will make summer friends that you can be close with forever!

STAFF AND STUDENT SPOTLIGHT

Interview with Ms. Galante

What's your favorite color? My favorite color is blue.

What's your favorite animal? My favorite animal is a penguin.

What's your favorite book? My favorite book is A Series of Unfortunate Events.

What's your favorite type of dog? My favorite dog is a corgi.

What's your favorite flower? My favorite flower is a rose.

When you were a kid did you want to be a teacher? Yes, when I was a kid I did want to be a teacher.

Written By Michaela Jawar and
Brynn Harvey, Grade 3

♥ All about Samara Friedman-Quinn ♥

Question one: What is one thing you like about school?

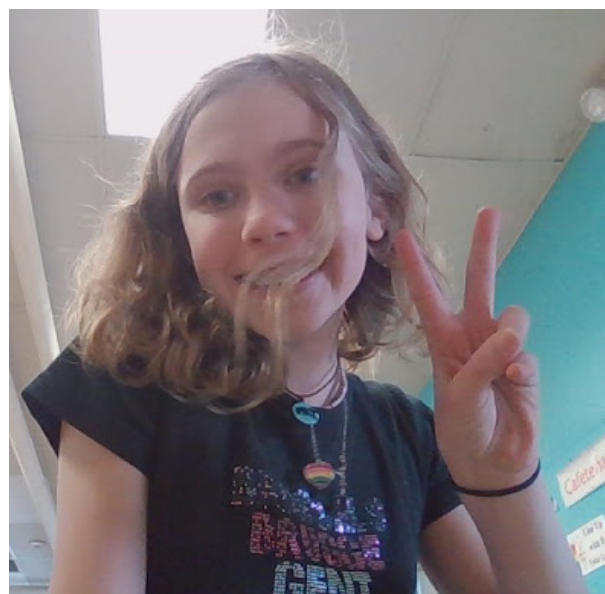

Answer: I love writing. I would like to encourage people who don't like to write to give it a second chance. 😊

Question two: What is your favorite show?

Answer: I love Owl House and I have no way to explain how much I love it! It's such a great show!

Question three: What is your favorite thing to do at the newspaper club?

Answer: I like writing the front page article and about the owl house. Everything else... not so much.

HOW TO...

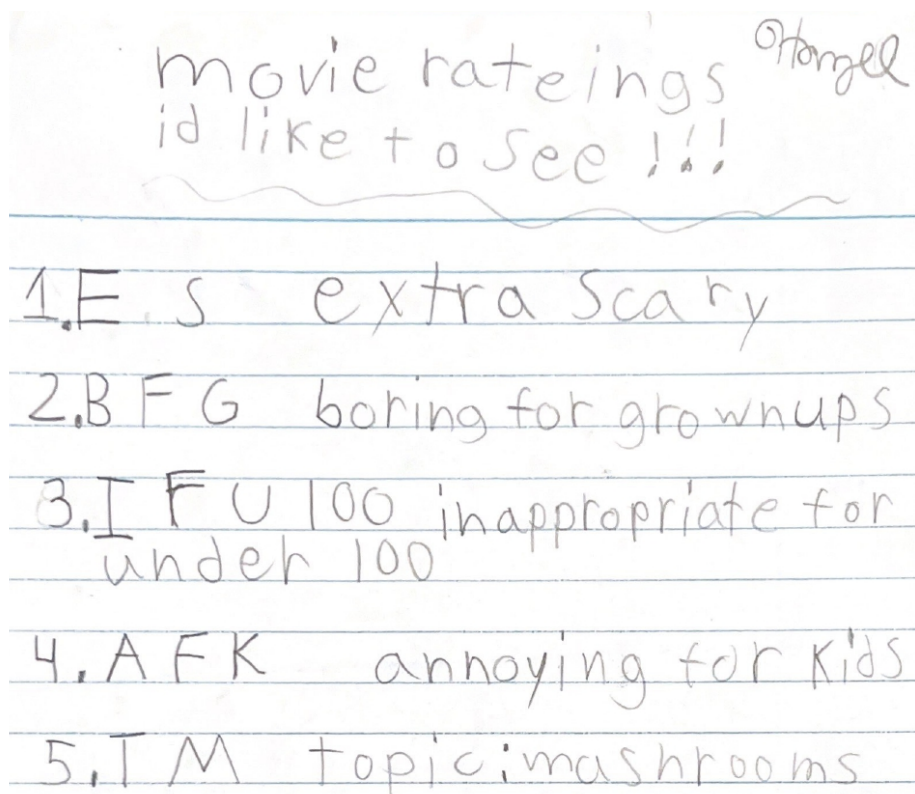

How To Focus And Take Screen Breaks

Written By: Emmylou Shay, Grade 5

Imagine a world where people aren't addicted to devices like phones and ipads, maybe, just maybe, it's not so bad. Here are some ways to focus your mind and take screen breaks. One way to focus is to minimize multitasking and find a calm and less decorated space. Doing this can ease your brain into just trying to do one thing. Some other ways are: to try getting more sleep, this can keep you from falling asleep or losing interest, you can take breaks, this will keep you interested and focused, or you could try to make a plan to work on one thing for about 20 minutes everyday.

Taking screen breaks for short or long periods of time can be healthy for you and your brain. These days people are always on their phones and devices, but it can be healthy and helpful to take screen breaks and here are some ways to get yourself on track: try having a timer for every 20 minutes to take 10 minute breaks, have a friend or parent put away your screen for a bit so you're not tempted to use it, or even take days off from the phone. You'd be surprised of the result! Too much screen time can have a big effect on adults and children!

NATHAN'S MAGICAL CREATURES

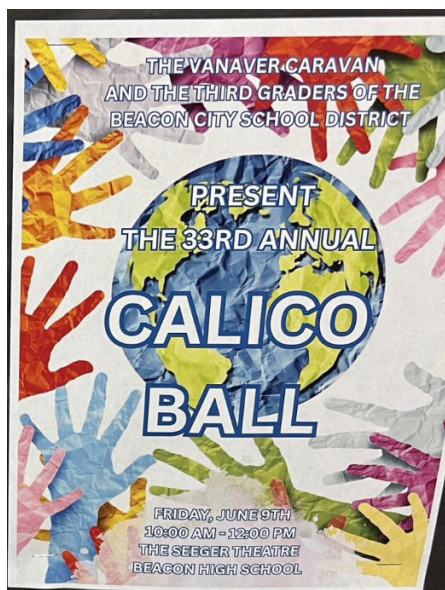

Sadly everybody, my magical creature adventure with you is coming to an end. This is my third and final issue for this newspaper. Today, we will be covering one of the most feared, but one of the nicest creatures out in the woods, werewolves. Here's some things to cover that we already know when humans transform in the moon and only a full moon. Today will be covering things that we don't know about werewolves. Here's something you didn't know there's a type of werewolf called a forever wolf. It is a kind of werewolf that can walk in daylight and doesn't need to transform. It's always a werewolf. Someway to tell if you're dealing with a forever wolf or a regular werewolf is a forever wolf is white. You'll want somewhere to protect yourself if you're dealing with a regular werewolf. If you're dealing with the regular werewolf, then you should always try and say something that's really personal to the human inside then that human will realize and they will come out as human. Once again good readers, I'm gonna miss you and remember there's magic in the world and anyone who denies it doesn't stop and look to see a world of magic.

Werewolves

CALICO BALL!

For about 5 weeks, students all over Beacon in third grade were learning about different countries and dances to represent those places. On June 8th, the whole school got to watch them perform and practice for their official performance on the stage at the high school. It was so much fun and something that kids could either look back on or look forward to in their time at Sargent. On June 9th, the entire third grade from all 4 elementary schools came together and celebrated their hard work through music, speeches and dancing. There were 4 classes that represented our school and they all did amazing, as well as the other kids! Mr. Carpenter and Mrs. Piqueras's class studied Greece. Ms. Perlongo and Mrs. Lizewski's classes studied Australia. Mrs. Belloch's class studied Egypt. Ms. Black's class studied Puerto Rico. All the hard work paid off and the kids said it is something they will never forget! Their teachers were so proud of them and hope they can learn from this experience and take the confidence they gained into their future!

BCSD STUDENT FILM FESTIVAL

The Film Festival!

On Saturday, May 12th, millions of people came to the film festival to see the amazing talents of young directors and actors and their amazing creations like yours truly's.

We, (by which I mean not just me but my co-stars Nathan Domanski, Radcliffe Dunne, Mateo Buckland, and Eli Havers) we all created a wonderful creation called "The Wendigo" (to learn about wendigos, go to Nathan's article on wendigos. I'm almost positive you will enjoy it!). We made this next to the amazing collection of over a hundred highly creative students of all age groups.

To all of you, big and small, old and young, JVF, Sargent, South Ave, and Glenham. I congratulate you, with the hearts of everyone in the newspaper club! You all did an amazing job!

Also, a shout out to all the Sargent kids who put their wonderful minds together and made something amazing! You, even as children, are all heroes of creativity.

SCARY SNAKES

Scary Snakes 🐍

Oona Giunta, Ale Guerra, Ruby Kimberg, Hazel Harvey

The Longest Snakes 🐍

1. Titanoboa - 50 feet long and 3 feet wide. Titanoboa made dinosaurs die.
2. Burmese python - 9 feet long and 1 feet wide
3. Reticulated python - 7 feet long and 9 inches wide

The longest snakes

What snakes eat

1. Small mammals 🐭
2. Birds 🐦
3. Reptiles 🐸
4. Fish 🐟
5. Amphibians 🐸
6. Insects 🐛
7. Eggs 🥚

Why are snakes good for the environment 🌍🌍🌍

Snakes are very good for the environment. Snakes keep prey populations in balance. If snakes didn't exist, there would be so many rats and other rodents. You should really love snakes now 🥰🥰🥰

ADVICE COLUMN

★ Attention all 5th graders★

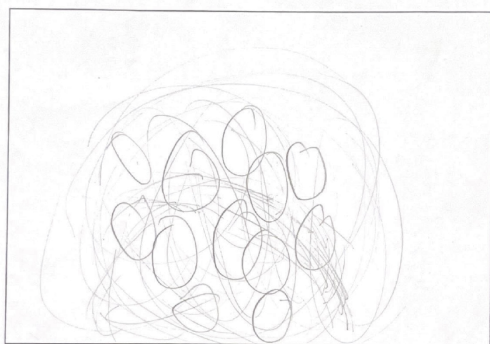

If you are nervous about Middle School

1. First believe in yourself and be confident
2. Try to make new friends
3. Find your classmates
4. Meet your teachers and get to know them
5. Practice your locker number
6. Study harder to get good grades
7. Be kind to everybody
8. Never be shy to ask anyone for help (I mean it's your first time in the Middle School)
9. 9th of all be yourself

THE MUSIC

Chapter I Adventurer

James is adventurous. He and his friend went on a hike, the climb took hours. But James made a promise, that was they wouldn't stop until they found something spectacular. When they started hiking it was good, but at one point they realized something was going on. When they heard singing and nice, but different than usual music all their snacks and water refilled.

But since something good was happening, they didn't care about the weird things that were happening around them. At one point they saw a strange booklet on top of what seemed like a really hard rock climb. They saw the word, "The" and the letters "MUSI". James and his friend, Jack, noticed the book and wanted to get it. They kept climbing and when they got to the top, they looked at the whole cover and it said, "The Music by cvicccccc". James was the first to the top, so he read the book first. All he saw was notes that looked like piano notes, or any other notes for an instrument, but they were different at the same time.

The notes fell off the page and blew from the wind. The notes seemed to be going somewhere. Luckily, Jack came up at the right time for them to follow the notes. The notes disintegrated after pointing to a very very large temple. They got a closer look and realized how big the temple actually is. When they were on the way to the top, they heard more music but this time louder. James thought the music must be coming from the temple. They ate their refilled snacks, they got to the top and had a sip of water. They saw that the temple door was locked. They realized it needed a thick key to open the door.

Chapter II The Music Parade

It was getting late so they went to bed. But the thing is, the music was still playing. Then out of nowhere a parade started. They saw people making music, then they saw them..... The people ran over to them. Luckily, one of them could speak English. He said "cves, they have our book. Here", "Have this key a tent, armor, weapons and 1000000000 gold nuggets".

Then James and Jack go inside and see people. The people sang "oooooo" and Jack and James were never seen again.
