DUTCHESS **COMMUNITY COLLEGE**

October 22, 2019

The fields of architecture, construction and engineering are vast. Some high schools have courses that expose their students to architecture, but many do not. Understanding the different careers and degrees and finding an internship or college with the right program can be daunting.

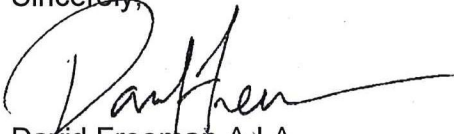

ACE Mentorship is a nationwide program that brings students together to work on a real project while introducing them to the fields of architecture, construction and engineering. Mentors include architects, contractors and engineers that volunteer their time to both work with the students on the projects and at the same time mentor them about the career opportunities.

Information night is Wednesday, November 13, 2019 at 6:30 pm at Spackenkill High School Library, 112 Spackenkill Road, Poughkeepsie, New York. Information about the ACE Mentorship Program, its benefits and what's in store for this upcoming season will be discussed. Parents and students ninth grade and above are welcome. Refreshments will be served.

The ACE Mentorship program starts in December and is held on Wednesday evenings until May. \$1,500 scholarships are available for seniors. Flyers for the event are enclosed. Please let your students know about this opportunity.

If you have any questions, please email me at freeman@sunydutchess.edu or phone at 845-431-8370.

Sincerely,

David Freeman A.I.A.
