The purpose of the Grad-Point Credit Recovery Program is to offer students the opportunity to earn credits for courses he/she has failed to complete successfully. Students will participate in an online, virtual program through which they will receive instruction and complete assignments, tests, and quizzes. A certified instructor will be present for each session and will be available to assist students with questions and system navigation. I understand the following:

- The Grad Point Credit Recovery Program is a unique, self-paced opportunity to recover a failed grade in a course.

- Seats in the lab are filled on a first-come, first-serve basis and that space will be limited to the number of available computers and/or licenses per session.
- My child understands that the minimum proficiency required for the Credit Recovery Program is 80% (eighty percent). Credit cannot be awarded until this level of proficiency is achieved.
- My child may work at home on lessons from the course but all pretests and posttests must be completed and proctored at school.
