

SAT Testing

<https://www.collegeboard.org/releases/2020/college-board-cancels-may-sat-response-coronavirus>

In response to the rapidly evolving situation around the coronavirus (COVID-19), the College Board is canceling the May 2, 2020, SAT administration. Makeup exams for the March 14 administration (scheduled March 28) are also canceled. Registered students will receive refunds.

The College Board will provide future additional SAT testing opportunities for students as soon as feasible in place of canceled administrations. We'll be as flexible as possible to give students the best chance to show their skills and stay on the path to college. We have not yet canceled the June 6, 2020, SAT administration and will continue to assess its status with the health and safety of students and educators as our top priority. The College Board is working with local partners, and we'll soon share information about weekday school-based administrations this spring of the SAT, PSAT 10, and PSAT 8/9.

To help students keep their college readiness skills sharp when many schools are closed, the College Board and Khan Academy will continue to provide free resources online, including full-length practice tests and personalized learning tools at khanacademy.org/sat. As a reminder, you can set up coaching tools in Khan for teachers to monitor student work. For more information on the coaching tools, visit satpractice.org/k12. If you need assistance setting this up, please reach out.

Together with our member schools and colleges, we will be flexible, thoughtful, and collaborative in exploring ways to continue to support student learning and provide opportunities to test during this challenging time.

In the coming days, the College Board will share additional information and details directly with registered students and test centers. A webpage with regularly posted information about the impact of the virus on the SAT can be found [here](#).

ACT Testing

Please following this link for additional information on how the COVID 19 virus has affected ACT testing:
