## INTRODUCTION

This handbook is a resource and guide for **strictly remote learners**. Strictly remote learners are defined as students who will remain home, complete all of their classes remotely and will not report to the physical classroom/building at all. These students will report to their remote classes, with their core teachers only (Math, Science, ELA, SS, Spanish 7+8). They will have these classes 4 times per week. Below is a visual aid depicting what a week looks like for a strictly remote student.

Below is a sample schedule for a **strictly remote student**. On paper, it appears that they will be on the computer from 8:20-2:42 PM; however, strictly remote students will only meet live on the computer with the classes highlighted in **PINK**. The other teachers will connect with the students by appointment and those classes are **asynchronous**. In asynchronous classes, the instructors provide materials and assignments that can be accessed at any time.

## REMOTE LEARNING ORIENTATION

We will hold an orientation for strictly remote learners on **Wednesday, September 23, 2020**. This orientation is not traditional due to the fact that these students do not need to be oriented to the building. Instead, we will use this time to do a meet and greet with teachers and students will have the opportunity to see their core area teachers in person. This event will be outside under our outdoor classroom tents, we will rotate the students between tents based on their student schedule. Below is the schedule outlining how the day will run.
